

Cat carrier familiarity log

Optional open-carrier practice only. Let your cat choose whether to approach or leave; do not force entry. An observation does not establish readiness to close, lift or travel. For a needed veterinary visit, contact your veterinary team about transport rather than waiting to complete this log.

Cat's name or initials: _____

Person observing: _____

Date and time	Setup	Voluntary response	How it ended	Next observation or question

Write what you saw; leave unknowns blank. A glance or walking away is a complete observation. Use the final column for a question or something to notice, without a progress deadline. This is an original writing aid, not a clinically validated assessment.
